

Why We Are Different

STEM

Our programs are STEM accredited and our founder is a certified STEM educational instructor.

AGE BASED

Learning with peers is important for social skills and collaboration. The complexity of topics and hands-on activities increases with each age group.

Theme Based

Multiple program themes with each session day a new medical themed topic and associated activities.

Engaging

Learning happens while having fun! Instructors guide group conversations and interactive theme based activities. They don't lecture.

Social

Whether onsite or online our programs facilitate learning through a shared experience. When kids collaborate and solve problems together, friendships are often formed.

- > CONTAGION
- > OCULUS
- > SANA
- > BORBORYGMI

THEMES OF FUTURE

ONSITE AFTER SCHOOL

- > ELEMENTS OF LIFE
- > ENVIRONMENTAL HEALTH
- > ESSENTIALLY YOU

ABOUT US

Unique STEM certified, medical science-based programs where kids get to be 'Doctors Each Week', have fun and make new friends. It is designed for kids who are intellectually curious and passionate about STEM (Science, Technology, Engineering and Mathematics). It combines learning with fun hands-on activities while being challenging enough to engage and inspire.

Each day of each program theme week in each age group is a different experience.
