Program Highlights

SPEECH NIGHT

Vision, confidence, and determination are qualities that our students strengthen during our annual Speech Night.

Students in younger grades are provided with topics to reflect on and prepare their stance on, whereas our middle-year students are provided the opportunity to choose a topic that they are passionate about to stir the audience in their favour.

STEAM FAIR

By engaging in the engineering design process, which involves stages like asking, imagining, planning, creating, experimenting, and improving, students actively seek innovative solutions to presented challenges. Within the context of STEAM challenges, our dedicated staff aims to foster and cultivate the growth of our students' problem-solving and collaborative skills.

In these endeavours, students challenged themselves to articulate the significance of their boxes, demonstrating the profound and diverse meanings these objects held for each individual. The results were a testament to their creative thinking and the transformative power of STEAM education.

ROWNTREE LEADERSHIP COUNCIL

Fostering the growth of our upcoming leaders through the Rowntree Leadership Council (RLC) is paramount to our school's mission. From spirited theme days and campus-wide gatherings to all the activities in between, these student-led initiatives thrive thanks to the unwavering commitment and hard work of this committee. These students not only excel in project management and event coordination but also serve as mentors, guiding younger students toward a potential future in the RLC. On behalf of the entire RMS community, we extend our heartfelt gratitude to the RLC for embodying the principles of empathy, lifelong learning, and global citizenship.

Growing students' skills and teamwork by connecting them with other ISP students to play fast chess online and in-person tournaments in local, regional and global contexts.

A learning journey which allows students across the ISP network to take action, share ideas, and design and implement change-making projects with long-lasting, measurable impact on their school communities.

A multi-disciplinary project in which students learn the importance of collaboration in achieving the common goal of producing a film, its trailer and poster. It provides insights into career pathways in film and media.

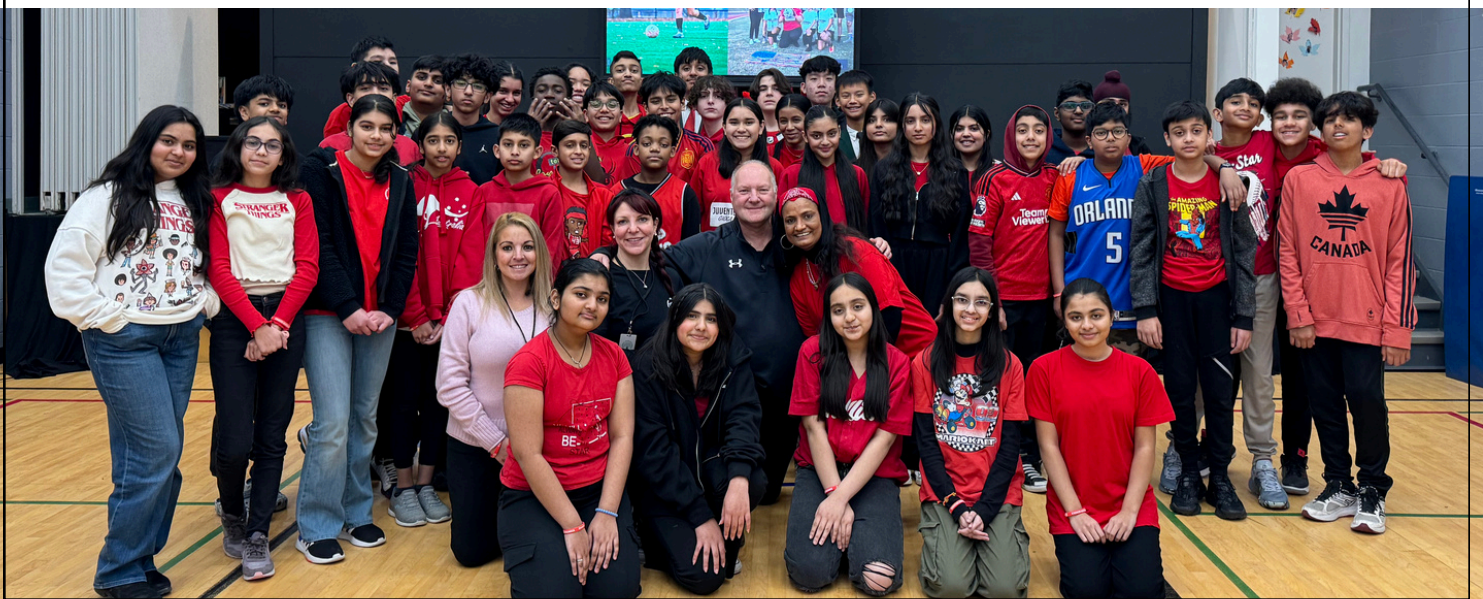

Offering students a one-of-a-kind opportunity to step into the role of citizen scientists, actively contributing to real-world STEAM research projects. Participants can engage in meaningful initiatives, such as mapping the journey of plastic waste or tracking their own habits to assess and reduce their environmental impact.

Offering authentic opportunities for students to create awareness about the rights and protection of street-connected young people while developing a variety of fundraising activities in their community.
